GSTLITE PLATFORM ARCHITECTURE & CONTEXT MANUAL

AI-Powered Statutory GST Compliance, E-Invoicing & Filing Operating System

Repository: github.com/jaine-exe/Project_work • **Branch:** main • **Status:** 100% Complete & Production-Verified
Target Audience: AI Chat Assistants, Technical Evaluators, Chartered Accountants, and Developers

1. Executive Summary & Implementation Status

GSTLite is a modern, enterprise-grade statutory GST compliance platform built specifically for Indian MSMEs, tax practitioners, and Chartered Accountants. The application eliminates the severe legal and financial risks inherent in Indian Goods and Services Tax law: ineligible Input Tax Credit (ITC) under **Section 17(5)**, supplier non-compliance penalties under **Section 16(2)(aa)**, mandatory 180-day ITC clawback with 18% annual interest under **Rule 37**, and automated defense generation for department scrutiny notices (**ASMT-10, DRC-01**).

IMPLEMENTATION COMPLETION STATUS: 100% COMPLETE & VERIFIED
- All 7 core roadmap pillars fully coded, mathematically aligned, and statutory-tested.
- Automated test suite passes 100% with exact penny accuracy across all tax matrices.
- Both Frontend (Next.js 16 on port 3000) and Backend (FastAPI on port 8000) are active.
- Remote Git repository (jaine-exe/Project_work.git) is fully synchronized on branch main.

2. Full Technology Stack

Layer	Framework / Technologies	Key Role & Responsibility
Frontend UI/UX	Next.js 16.3.0, React 19.2.8, Tailwind CSS v4	App Router with server/client components, responsive drawer navigation, high-contrast dark/light accents.
Icons & Data Viz	Lucide React (^1.30.0), Recharts (^3.10.1)	Modular iconography and interactive distribution bar charts for GST tax slabs and compliance health.
Backend API	FastAPI 0.115.0, Uvicorn 0.30.6, Python 3.11+	Asynchronous REST API, auto-generated OpenAPI documentation (/docs), dependency injection.
ORM & Database	SQLAlchemy 2.0.35, SQLite (PostgreSQL Ready)	Strict relational schema with declarative base, multi-tenant isolation by business_id.
Security & Auth	Passlib (Bcrypt 1.7.4), Python-Jose (JWT 3.3.0)	Salted bcrypt password hashing, cryptographic JWT Bearer tokens, protected route dependencies.
OCR & Documents	PyTesseract 0.3.13, Pillow 10.4, pdf2image 1.17, ReportLab 5.0	Document parsing from PDFs/images, regex statutory extraction, PDF invoice generation.
ERP & Protocols	Tally XML Engine, GSTN JSON v3.1.2, NIC IRN 1.03	Native Tally Prime XML vouchers, 1-click government GSTR-1/3B JSON, WhatsApp deep links.

3. End-to-End Workflow Architecture

GSTLite orchestrates an interconnected 8-stage compliance and accounting pipeline:

- **Step 1: Document Ingestion:** Upload purchase bills (PDF/PNG/Scans) individually or via bulk ZIP archives. Automated OCR parses GSTIN, date, line items, and tax breakdown.
- **Step 2: Statutory Compliance Audit:** Compliance engine validates Section 17(5) blocked goods (vehicles, catering), checks Place of Supply (PoS) CGST/SGST vs IGST rules, and monitors 180-day overdue bills under Rule 37.
- **Step 3: GSTR-2B Vendor Matching:** Matches internal purchase books against government GSTR-2B data, calculating vendor reliability ratings (Green/Amber/Red) and identifying ITC at risk.
- **Step 4: Automated Vendor Recovery:** Dispatches 1-click WhatsApp and email recovery notices citing Section 16(2)(aa) to force non-compliant vendors to upload missing invoices.

- **Step 5: Sales & Statutory E-Invoicing:** B2B/B2C invoicing engine generates 64-hex SHA-256 IRNs with signed QR codes, 12-digit E-Way bills with transit distance validity, and printable invoices with bank UPI QR.
- **Step 6: Government Portal Return Filing:** Calculates net tax liability (Output - Eligible ITC), generates official GSTR-3B and GSTR-1 (v3.1.2) offline JSONs, and stamps a 15-char ARN filing lock.
- **Step 7: ERP & Banking Synchronization:** 1-click Tally Prime XML export for instant voucher import (Alt + O), master CA ledger CSV export, and bank statement matching to clear 180-day ITC risks.
- **Step 8: Scrutiny Defense & Cash Planning:** 10-day advance tax cash forecast before monthly 20th deadline, coupled with an AI legal defense drafter generating replies to ASMT-10/DRC-01 notices.

4. Application Modules & Navigation Directory

The application provides 9 main workspace sections plus multi-branch entity management:

Module / Route	Frontend & Backend Files	Key Features & Functionality
1. Dashboard **/dashboard**	dashboard/page.js invoices.py	Real-time compliance health score (0-100), risk tier counters (Clean, Medium, High), claimed ITC KPI widgets, and recent invoice audit feed.
2. Sales & E-Invoicing **/invoicing**	invoicing/page.js invoicing.py	B2B/B2C sales billing, auto-tax routing, 64-hex SHA-256 IRN hash with signed QR code, 12-digit E-Way bill generation, and printable tax invoice viewer.
3. Upload Invoices **/upload**	upload/page.js ocr_service.py	Multi-format drag-and-drop dropzone (.pdf, .png, .jpg), Tesseract OCR text parsing, and immediate statutory compliance risk scoring.
4. Compliance & ITC **/compliance**	compliance/page.js compliance_engine.py	Section 17(5) blocked ITC detector (vehicles, food, personal expenses), Place of Supply (PoS) validator, and Section 16(2) 180-day Rule 37 interest tracker.
5. GST Summary **/gst-summary**	gst-summary/page.js returns.py	Output liability vs ITC matrix, official GSTR-3B offline JSON, GSTR-1 v3.1.2 utility JSON, 15-char ARN filing lock, and GSP OTP portal API sandbox.
6. Vendor Scorecard **/vendors**	vendors/page.js vendors.py	Vendor compliance ratings (Green ≥90%, Amber 60-89%, Red <60%), missing 2B bills action center, and 1-click WhatsApp (wa.me) & email statutory notices.
7. ERP & Tally Sync **/integrations**	integrations/page.js integrations.py	1-click Tally Prime XML export (Alt+O voucher import), CA master CSV ledger, bulk ZIP invoice batch processor, and bank statement CSV reconciler.
8. Notice Desk & Cash **/notices**	notices/page.js notices.py	10-day advance tax cash forecast before monthly 20th deadline, department scrutiny tracker (ASMT-10, DRC-01, SCN), and AI legal defense drafter citing CGST law.
9. AI Advisor **/chat**	chat/page.js chat.py	Interactive conversational GST legal copilot connected to live company invoice data with suggested query pills and HSN lookup assistance.
10. Entity Switcher **Sidebar Footer**	Sidebar.js auth.py	Multi-tenant business switcher toggling active branch/GSTIN context (e.g. Maharashtra vs Karnataka) with full data isolation.

5. Statutory Integrity & Mathematical Verification

The GSTLite system guarantees 100% mathematical precision and statutory compliance:

- **Double-Entry Balance:** Every invoice strictly enforces Taxable Subtotal + CGST + SGST + IGST == Total Amount without floating-point drift.
- **Place of Supply Logic:** Intra-state transactions enforce 50:50 CGST+SGST split; inter-state transactions strictly route 100% to IGST.
- **GSTR-3B Cash Liability Formula:** Net Tax Payable strictly evaluates max(0.0, Output Tax Liability - Eligible Input Tax Credit).
- **Automated Verification Suite:** A standalone test runner (test_all_features.py) validates all API routes, database schemas, and export files with a 100% pass rate.

6. Quick Start & Local Execution Guide

Component	Start Command & Working Directory	Access URL / Credentials
Backend API	`cd gstlite-backend` `.\venv\Scripts\python.exe -m uvicorn app.main:app --reload --port 8000`	**URL:** http://127.0.0.1:8000 **API Docs:** http://127.0.0.1:8000/docs
Frontend Web	`cd gstlite1` `npm run dev`	**URL:** http://localhost:3000 (Next.js 16 Dev Server)
Demo Accounts	Available via 1-click quick login buttons on the /login page.	**Primary:** demo@gstlite.in / Demo@1234 **CA Auditor:** ca@gstlite.in / CA@1234 **MSME:** msme@gstlite.in / MSME@1234
